

Auxier Welding Inc.

New Auxier Welding Shuttle Car

Supplying quality OEM parts and equipment, and specializing in fabrication and custom equipment manufacturing, Auxier Welding has loyally served the coal mining industry since 1984.

The company's mission is to fulfill customer needs by collaborating with industry experts in innovative design and manufacture of custom heavy duty equipment and parts. Auxier Welding provides state of the art machines that fit the needs of a range of mining conditions while exceeding safety and quality standards. With its own advanced designs, the company specializes in shuttle cars and feeder breakers. Stellar economic solutions are paramount. Integrity and accountability drive the building and maintenance of lasting relationships with customers.

Auxier Welding is best known for providing high quality work coupled with outstanding customer service as an OEM supplier of underground mining equipment. The 60,000 sq. ft. facility in Belva, WV employs skilled welders, fabricators, mechanics, and electricians, as well as a CAD department and CNC oxy/acetylene torch. There is an 8,000 sq. ft. warehouse, an additional 13,000 sq. ft. fabrication shop, and a well-equipped machine shop.

The 10,000 sq. ft. machine shop houses six modern CNC machines as well as seven conventional manual machines and an automated band saw. Twelve full-time employees provide precision turning, milling, drilling, tapping, slotting, boring, threading, and sawing operations on a variety of materials including plastics, aluminum, brass, mild steel, Hardox 400, 4150HT, and steel castings.

There are numerous quality control procedures which enable machinists to make highly accurate parts to match the specifications and tolerances of customer provided drawings. Auxier Welding is capable of reverse engineering existing parts and providing drawings for customer approval and future reference.
