

Metalcraft Mining Equipment

Metalcraft Management Team

Metalcraft Mining Equipment, located in Summerville, WV, specializes in custom remanufacturing, reconditioning, repair, and sales of underground mining machinery. The company also offers custom steel fabrication. While the industry has changed, the Metalcraft mission for 30 years has not. The goal at Metalcraft is simply “to provide outstanding service at competitive prices”.

The Metalcraft service begins with a sincere dedication to customers and employees with a substantial number of employees being with the company for ten years or more. Metalcraft remanufactures all types of underground equipment incorporating the latest design changes and updates. Complete remanufactured machinery carries a 180 day limited warranty with new frames having a 1 year limited warranty. Customers are invited any time and to the final testing. Service personnel visit the mine on equipment start-up and as needed later.

The list of equipment that can be rebuilt or repaired by Metalcraft is endless. For room & pillar the equipment includes: roof bolting machines, continuous haulage, feeders, shuttle cars, belt drives, continuous miners, scoops, coal haulers, coal drills, horizontal degas drills, and personnel carriers. For longwall the list includes: line pans, head and tail drives, ramp pans, and belt tail pieces. Metalcraft also rebuilds machine sections and components such as drill booms, gearcases, crawler assemblies, scoop buckets, gathering pots and pans.

The benefits associated with equipping underground mining equipment with crawlers is a focus of Metalcraft. Cat drive retrofits can be used on roof bolters and mobile roof supports (MRS). The cat frames can be welded or bolted on. Sales of mining equipment is another service offered with a wide variety of mining equipment being available for remanufacture or repair. Featured items include: Fletcher CHDDR roof bolter used very few hours, and Stamler BF 17A-54-105C feeder available for quick delivery. A list of other equipment can be seen at www.metalcraftminingequipment.com.

Metalcraft has extensive fabrication facilities and its qualified team can help with any fabrication needs. There is a CAD system including a computerized cutting torch and expertise extends from individual parts to fabrication of machine sections and complete frames.
